VICTOR HUGO FERREIRA DANTAS

AI-ASSISTED DEVELOPMENT | PROJECT OPERATIONS | INFORMATION TECHNOLOGY

Barueri, SP, Brazil | victor.hugofdantas@gmail.com | Portfolio | GitHub | LinkedIn

PROFESSIONAL PROFILE

IT and project professional with hands-on experience in retail rollout and modernization, school connectivity support, and telecommunications infrastructure. Combines operational project execution with web systems and automation development. Creator of Hughes Web, officially adopted by the company, and the independent products IT Inventory and ProjectOps. Experienced in AI-assisted development (vibe coding), requirements definition, code review, functional validation, testing, and iterative product delivery.

PROFESSIONAL EXPERIENCE

Junior Project Assistant

Faiston | Oct 2026 - Present

- Support the ZAMP / BK e Fogo program, focused on retail store rollout, renovation, and modernization, with emphasis on IT infrastructure workstreams.
- Track technical assessments, schedules, vendors, and installation partners to support store readiness and openings.
- Control equipment, materials, and invoices within the SOMA workflow; support equipment delivery, deployment, and reverse logistics.
- Track network, rack, connectivity, display, and POS/KDS issues; support validation of installation books, evidence, and post-opening quality.
- Develop Field Technician Dispatch and the N2 Control prototype to streamline service queues, technician contacts, operational records, statuses, and evidence handling.

Project Assistant

Hughes Network Systems Brasil | Apr 2026 - Aug 2026

- Worked on the EACE Aprender Conectado program, supporting schools and technical partners with connectivity and network equipment requests.
- Performed N1 triage, gathered failure information, and routed incidents to the teams responsible for technical resolution.
- Opened and tracked support tickets with field service providers and internet service providers, maintaining service history and progress.
- Conceived and developed Hughes Web, a React, TypeScript, and Supabase portal officially adopted by the company to manage schools, tickets, and infrastructure.

Telecommunications Analyst

act digital | Aug 2025 - Apr 2026

- Managed and supported telecommunications infrastructure with a focus on availability and performance of voice and data services.
- Monitored, configured, and maintained corporate communication systems; diagnosed and resolved network incidents.
- Prepared technical reports and supported the integration of connectivity solutions.

IT Administrative Assistant

Hospitalis - Nucleo Hospitalar de Barueri | Jul 2024 - May 2025

- Managed incoming/outgoing assets, inventory, and organization of medical and IT equipment; opened and tracked service orders in NeoVero.
- Installed and maintained Drager monitors in the ICU and trained hospital teams on technical support ticket procedures.
- Actively participated in the ONA (National Accreditation Organization) audit process.

PROJECTS & SKILLS

Digital solutions for operations, assets, and project delivery

SELECTED PROJECTS

IT Inventory | **Independent Product**
IT asset management platform (ITAM/CMDB) with offline data collection, synchronization, photos, OCR/QR support, asset movements, and custody tracking. Includes role-based access, traceability, and data export.
React | TypeScript | Vite | Tailwind CSS | Supabase/PostgreSQL | IndexedDB | PWA

ProjectOps | **Independent Product - Active Development**
Workspace for tasks, projects, cases, and rollout tracking. Its Store 360 module maps environments, equipment, and technical points through 2D floor plans and 3D visualization, connecting project management with the physical context of each site.
React | TypeScript | Supabase/PostgreSQL | RLS | Vitest

Field Technician Dispatch | **Field Coordination**
Application for managing technician dispatch queues, spreadsheet imports, contacts, acceptances, refusals, and transfers. Includes Operator and Supervisor profiles, history, and operational reporting for Faiston workflows.
React | TypeScript | Vite | Supabase

N2 Control | **Functional Prototype**
Operations dashboard for tracking technicians and schools, importing CSV data, supporting WhatsApp contact workflows, recording statuses, and organizing field evidence. Prototype under validation for Faiston field operations.
HTML | JavaScript | CSV | Evidence Export

TECHNICAL SKILLS

Development: JavaScript, TypeScript, React, Node.js, HTML, CSS, Vite, Tailwind CSS.

Data & Delivery: Supabase, PostgreSQL, authentication, RBAC/RLS, Git/GitHub, Vercel, testing, and continuous integration.

AI & Automation: AI-assisted development (vibe coding), prompt and requirements design, code review, functional validation, documentation; ChatGPT, Claude Code, Codex, Gemini, Python, and Playwright.

IT & Operations: Windows, Linux, LAN/WAN networking, hardware, ticket management, asset inventory, Microsoft Office, and NeoVero.

EDUCATION & COURSES

Technology Degree in Systems Analysis and Development
Gran Faculdade | Online | 2025 - Present

Complete Modern Web Development with JavaScript + Projects | Udemy

JavaScript | Curso em Video

JavaScript Development and Introduction to Administration | Fundacao Bradesco

Languages: Portuguese - Native | English - Intermediate

ADDITIONAL EXPERIENCE

Sales Manager | Meczada Sorveteria (own business) | Oct 2023 - May 2024

Business Agent | JD Telecom / Claro | Apr 2023 - Aug 2023

Apprentice | Ibrasa | Dec 2021 - Feb 2022
